PERSONAL DATA

- Age: 24
- Sex: Male
- Date of birth: 03-07-2000
- Marital status: Single

OTHER INTERESTS

- Pc Hardware
- Cycling
- Soccer
- Piano and guitar
- Travelling
- Camping stuff

EDUCATION

- Bachelor of information systems engineering (2019)
- In the fourth year with a GAP of 8.55/10
- Universidad Tecnologica Nacional (UTN)

SKILLS

- Backend
 - Node.js, NestJS, Express.js, TypeScript, REST APIs, GraphQL, Webhooks, Modular Architecture, Controllers, Services, DTOs, Dependency Injection, Middlewares, Guards, Interceptors, Redis, Cron Jobs, Asynchronous Processing, Event-Driven Backend Flows, Microservices, Swagger/OpenAPI.
- Cloud & DevOps
 - AWS S3, AWS Lambda, CloudWatch, Serverless, Docker, Docker Compose, CI/CD, GitHub Actions, Cloud Deployments, Environment Variables, Structured Logging, Datadog, Monitoring & Observability, Reverse Proxy, SSL, Domains, Load Balancing fundamentals.
- Frontend: React.js, Next.js, React Native, JavaScript, TypeScript, Responsive UI.

PERSONAL PROJECTS

- Comandita – Food Ordering SaaS
 - Multi-tenant food ordering platform built with NestJS, TypeScript, PostgreSQL, TypeORM and Next.js. Includes authentication, role-based access control.
- Gerardo – Investment Automation Assistant
 - Backend assistant built with NestJS, Supabase and broker API adapters to track portfolio data and automate stock purchase workflow.
- [Capri Noticias](#) – AI News Digest
 - Node.js-based AI digest platform that collects news from configurable RSS/scraping sources, selects relevant content, summarizes it with AI.

WORKING EXPERIENCE

- Full-stack Developer at 123seguro (may 2021- jun 2023)
 - Built and maintained backend services using Node.js, Express, TypeScript.
 - Developed and maintained integrations with multiple insurance companies.
 - Worked on event-driven backend flows to handle insurance integrations, data synchronization and long-running business processes.
 - Participated in a microservices-based architecture, collaborating on service communication, API contracts and backend reliability.
 - Wrote backend tests with Jest and Supertest, with strong focus on API behavior.
 - Worked with Dockerized environments and cloud-based infrastructure on GCP.
- Full stack Developer at Qubika (jun 2023 - now)
 - Full-stack in [thewritersfactory](#) web app (monorepo, stripe integration)
 - Internal projects such as creating a ChatGPT (socket.io) clone
 - Full-stack developer in [OnePay](#) (Jan 2024 - now)
 - Built and maintained full-stack features for a US fintech product using NextJs, Node.js, Express, TypeScript, REST APIs and GraphQL.
 - Worked on backend integrations with external services, webhooks, microservices, scheduled processes and cloud services such as AWS S3, Lambda and Amazon Connect.
 - Participated in production troubleshooting, debugging and observability using Datadog logs, metrics and traces.
 - Developed and maintained automated tests using Jest.
 - Worked with CI/CD workflows and environment-based configurations.
 - Collaborated closely with product, QA, design and US-based stakeholders in an agile environment.
